## **WAMFLO® Front Dust Collector**

## **Description**

WAMFLO® Front Dust Collectors are equipped with a cylindrical shape stainless steel body with flanged connection that contains vertically mounted filter elements. The air jet cleaning system is integrated in the top cover. A top-mounted suction fan creates the negative pressure necessary for de-dusting.

## **Function**

The modular system combines the maximum safety of a flanged body connection with the variety of options in terms of type of filter media and filtering elements with the unique integrated pneumatic cleaning system design. Membrane-type, water-repellent filter elements ensure efficient dust collection and separation of moist particles.

## **Application**

In concrete batching plants WAMFLO® Front Dust Collectors are used for de-dusting the stationary concrete mixer.

## **Benefits**

- Safety for OEM and End User;
- ✓ Operating cost reduction;
- ✓ Low energy consumption;
- ✓ Maintenance cost reduction;
- ✓ Compliance with health and safety standards;
- ✓ Attractive price.

## **WAMFLO® Front Dust Collector**

## **Technical Features / Performance**

- 304 stainless steel flanged cylindrical shape body
- Filter surface from 12 to 22m<sup>2</sup>
- Low emission level due to B.I.A.-certified filter media
- Air Volume from 60 m<sup>3</sup>/h to 1,400 m<sup>3</sup>/h
- Compressed air jet cleaning system

- ► High cleaning efficiency due to "Full Immersion" solenoid valves incorporated in aluminium air tank (corrosion-resistant) for low-maintenance operation
- Fan integrated into top cover
- No tools for filtering element removal required
- Large inspection door

## **Overall Dimensions**

MIXER VOLUME m <sup>3</sup>	Filter Surface m³ FNS	ØL	В	C	Fan kW
1 - 1.5 - 2	12	600	1,725	1,313	1.5
3 - 3.5 - 4	22	800	1,830	1,343	2.2
